Colours. Service. Quality.

AN INDUSTRIAL SITE DEDICATED **TO CUSTOMER SERVICE**

Sepalumic stands out from the crowd with its state-of-the-art storage and coating centre. Constantly innovating, this site, which is based in Genlis in eastern France, is a benchmark with its teams and infrastructures, and offers an unrivalled range of products and services.

THE ADVANTAGES OF **ALUMINIUM**

CUSTOMISABLE ACCESSORIES

Accessories can be colour-matched to your woodwork for a perfect finish. * Sani'Laq antimicrobial coating has been developed for treating handles and reduces the risk of spreading germs.

TWO-COLOUR SYSTEM

The two-colour system allows two colours to be integrated into your aluminium frame (interior and exterior).

TOWARDS **SUSTAINABLE QUALITY**

In order to offer you and your customers the highest existing level of quality, our colour range proposes several Class 2** shades: Anodics**, Exclusives**, Metallics**

Class 2 powders offer various advantages:

> **Higher quality lacquering**

The mechanical properties of class 1 are retained in addition to those in class 2.

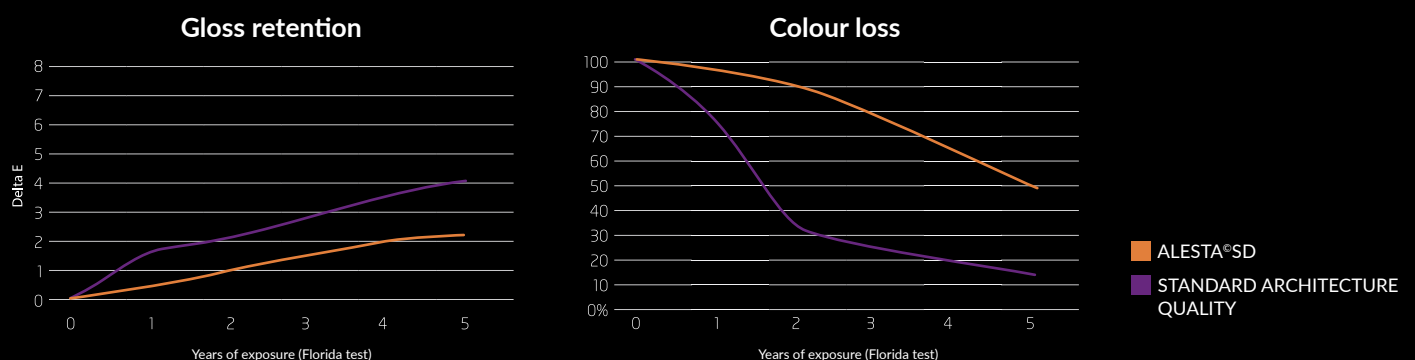

> **"Super-efficient" lacquering**

More UV-resistant and durable.

> **Excellent workmanship and full control of the surface appearance**

Greater surface homogeneity.

**Class 2 powders provide superior gloss retention over time and an almost imperceptible change in colour.

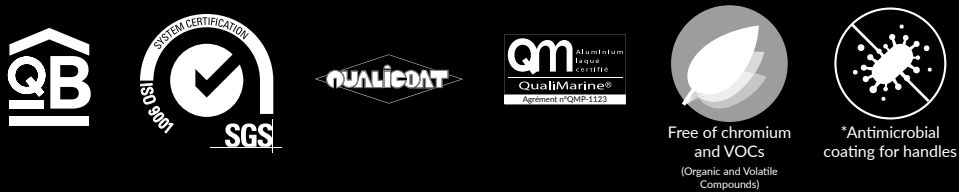

DARE

TO BE COLOURFUL

Sepalumic continues the entrepreneurial and family tradition based on simple and lasting human relationships, while continuing to innovate with boldness as its watchword.
